Doug:

Wow... Thanks for the update.

Without stressing the system, or yourself, when do you think you might be done with the edits you mention?

Jeff,

Not having any difficulties yet regarding the Marine Section. Been tasked in a couple different directions

though regarding arctic drilling.

I'm stalling for a couple comments and sign offs. The draft has passed through our NOAA technical writer, in editorial review and did very good. An abstract is drafted. I'm expecting to hear back from a couple technical science reps at any moment on the marine mammal and marine salmon language. However, their moments appear longer than mine. I do not see any red flags. More cites if anything.

You can have what I have now if you desire for internal review. I have a couple unused cites to omit, a graphic to finish, a title page to format, and wanted to get it at least through the salmon and marine mammal folks prior to sending to you.

What do you want me to do?

Hello Team:

Thanks again for your hard work on the Bristol Bay Assessment. If you have not passed along your sections to Kate and Glenn, please do so as soon as possible and no later than COB tomorrow. We need to get our first draft together soon.

I am canceling today's assessment team call. The time is better spent working on the report. That said, please let me know if you are having difficulties and need to talk through where you are in terms of writing assignments.
